Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being unpatentable by Safai (US Patent # 6,715,003).

[Claim 1]

Safai teaches an electronic device (figures 1-7, camera 100) operable to capture image information comprising an input sensor (figure 2, image detector 202) operable to receive optical information in association with providing a digital image (col. 5 lines 35-41), a memory (figure 2, storage 212) operably coupled to the image sensor via a CPU, the memory operable to store image information associated with the digital image (col. 6 lines 2-5) and a process reference stored within the memory and operable to be associated with the image information (col. 9 lines 17-28, The address information like an e-mail address or a website address are read as a process reference and is stored in an internal table in a memory 212). Safai further teaches that the camera is connected to a PSTN 606 (col. 14 line 59-col. 15 line 5, figure 6) and is configured to upload the photos received from camera 100 to a designated server or website (col. 16 lines 30-32).
